SUMMARY

Front-End Developer with over 3 years of experience building modern web applications. Skilled in developing responsive, high-performance, and user-friendly interfaces using HTML, CSS, JavaScript, TypeScript, ReactJS, and Next.js. Passionate about learning new technologies and continuously improving development practices to stay aligned with industry trends. Currently expanding backend knowledge with the goal of becoming a Full-Stack Developer in the coming years.

SKILLS

- **Programming:**
 - **Languages:** JavaScript, TypeScript, HTML, CSS
 - **Front-End:** ReactJS, NextJS, Angular (basic)
 - **State Management & Reactive Programming:** Redux, Zustand, TanStack Query, SWR, RxJS
 - **UI Libraries:** Material UI, Ant Design, KendoUI, RadixUI, TailwindCSS, Bootstrap
 - **Databases:** MySQL, PostgreSQL
 - **Real-time Communication:** Socket.IO, SSE
 - **Tools:** Git, Docker, Vite, Github Actions, AI-assisted coding workflows (Claude, Copilot, Antigravity)
- **English:** Upper-Intermediate level

WORK EXPERIENCE

MOR Software

Apr 2025 - Jul 2026

- Migrated CareerViet's recruitment website from a legacy Smarty PHP stack to Next.js, leveraging SSR and static optimization to deliver a 50% speed improvement.
- Optimized on-page SEO through SSR, semantic HTML, and metadata strategy, improving search engine visibility.
- Leveraged AI coding assistants (Claude, ChatGPT, Copilot) to accelerate development of repetitive UI logic, boosting feature velocity.

AIT Corporation

Jul 2024 - Mar 2025

- Built a Next.js furniture e-commerce platform (Nick Scali Australia) with a Contentful headless CMS, configurable product options.
- Independently delivered a React-based web application for Viettel Post as the sole front-end developer.

NTQ Solution

Feb 2023 - Jun 2024

- Contributed to developing front-end user interfaces and UI logic for a web application with a specific financial business using HTML/CSS, TypeScript, and NextJS.
- Implemented a new design for a high-traffic e-commerce website, enhancing user experience and engagement.
- Established automated testing with Cypress, improving release confidence and reducing regression bugs.

EDUCATION

Post and Telecommunication Institute of Technology

Aug 2018 - Feb 2023

- Engineer's Degree in Information Technology

PROJECTS

MOR Software

◆ CareerViet Recruitment Platform - careerviet.vn

Apr 2025 - Jul 2026

- **Position:** Front-End Developer
- **Description:** An end-to-end recruitment ecosystem built for the Vietnamese market, comprising two core components: a job platform that connects candidates with employers nationwide, and an admin management tool that gives administrators full control over platform data and operations.
- **Team size:** 25
- **Technologies:** NextJS, TypeScript, SWR, Material UI, Radix UI, i18n, ChartJS, SSE, React Hook Form

- **Responsibilities:**

- Re-architected page templates with Next.js SSR/SSG and optimized on-page SEO through semantic HTML, structured data, and metadata strategy — boosting search visibility and organic traffic.
- Directly implemented system features based on requirements and design, such as jobseeker/employer information management, job posting management, application profiles, CV builder,...
- Optimized on-page SEO through semantic HTML, structured data, and metadata strategy, improving search engine visibility and organic traffic.
- Optimized Core Web Vitals (LCP, CLS, INP) via image optimization, code-splitting, lazy loading, and font strategy, improving Lighthouse scores and overall perceived performance.

AIT Corporation

◆ Viettel Post Staff Evaluation

Nov 2024 - Mar 2025

- **Position:** Front-End Developer
- **Description:** A web application for evaluating employees based on their performance and corporate policy violations.
- **Team size:** 8
- **Technologies:** ReactJS, Typescript, Tanstack Query, Zustand, AntDesign, SCSS
- **Responsibilities:**
 - Created the code base and basic components for common usage to ensure consistency and efficiency across the application.
 - Implemented user interfaces based on Figma design specifications, ensuring precise adherence to visual and functional requirements.
 - Integrated SSO authentication into the React application, connecting with the company's identity provider to streamline user login and access control.
 - Worked closely with back-end developers and QC throughout the development cycle to deliver stable, fully-tested features.

◆ Nick Scali Australia - nickscali.com.au

July 2024 - Nov 2024

- **Position:** Front-End Developer
- **Description:** Built a premium furniture e-commerce platform inspired by Nick Scali, featuring a product catalogue, configurable sofas/recliners, showroom locator — content managed via Contentful headless CMS.
- **Team size:** 10
- **Technologies:** NextJS, ReactJS, Typescript, Radix UI, Zustand, TailwindCSS, Framer Motion, GSAP
- **Responsibilities:**
 - Established the project's code base and a library of reusable components to ensure consistency and accelerate feature development across the application.
 - Modelled products, categories, and campaigns in Contentful, fetched via typed API layer using SSR, ISR, and streaming to improve SEO and deliver fast page loads.
 - Implemented responsive UI to deliver a seamless experience across desktop, tablet, and mobile devices.
 - Animated UI with GSAP/ScrollTrigger (scroll effects) and Framer Motion (micro-interactions).

NTQ Solution

◆ Pronexus Fund Document System

May 2023 - Jun 2024

- **Position:** Front-End Developer
- **Description:** Developing a web application for managing and creating financial report documents, based on an existing .NET Framework application.
- **Team size:** 40
- **Technologies:** NextJS, Tanstack Query, Redux-Toolkit, Redux Thunk, KendoReact, SlateReact, SpreadJS, SCSS, Cypress, ChartJS
- **Responsibilities:**
 - Delivered key features alongside back-end developers: document management, HTML/PDF/Word/Excel exports, data-driven charting, an embedded PDF viewer, and inline editing.
 - Built a custom rich-text editor on SlateReact tailored to the client's authoring requirements.
 - Migrated state management from Redux Toolkit to a hybrid React Query + React Context architecture, reducing boilerplate and simplifying server-state handling.
 - Used Cypress to create and develop automation testing for features in the application.
 - Collaborated with QC to identify and resolve defects across the application.
 - Maintained and optimized code to enhance overall system performance.

◆ **247 Blinds - 247blinds.co.uk**

Feb 2023 - April 2023

- **Position:** Front-End Developer
- **Description:** Applying a new design to an e-commerce website using Magento.
- **Team size:** 8
- **Technologies:** Magento, LESS, JQuery
- **Responsibilities:**
 - Collaborated with Magento developers to implement user interfaces that align with design specifications, ensuring a cohesive and visually appealing end product.
 - Implement responsive UI design to ensure seamless functionality and optimal user experience across multiple devices.
